

# Industry Park

Scale: 1/4" = 1'-0"

Industry Park is situated between South 7th Street and South 10th Street directly east of the historic, Wayne County Courthouse. The major goal of Industry Park is to offer the residents and employees nearby both passive and active recreation. The park offers two distinct but cohesive spaces where users can enjoy lunch with a friend or coworkers. The park also offers a sizable performance amphitheater where visitors can enjoy an evening show of their favorite genre of music. This amphitheater space also provides the room for an open lawn to turn to play a pickup game of team football or throw a Frisbee around or even have a soccer game. Underneath one of the many groves of trees, Industry Park also provides the dog owners of downtown with an enclosed dog park allowing their furry friends to run around off of the leash for some exercise.

Visitors to Industry Park will really be able to feel the industrial heritage that inspires from the water tower to the construction of the park. The retaining walls we made from Corten steel which will rust early and become a rich color of deep brown giving the space a warmer feeling that invites people walking by on the sidewalks to come in and wander around for a bit. The plantings combined with benches near the street entrances create a quiet, relaxed, and comfortable evening space for all to enjoy a bit of their favorite music.
